

# WHAT TO DO IN THE CASE OF A **SNOW STORM**

## **1. BE PREPARED**

Make sure that you have food and water for at least 7 days. Don't forget the pets!

## **2. WINTERIZE YOUR HOME**

Winterize your home to extend the life of your fuel supply by insulating walls and attics, caulking and weather-stripping doors and windows, and installing storm windows or covering windows with plastic.

## **3. KNOW THE TERMS**

Know the terms used to describe changing winter weather conditions and what actions to take. These terms can be used to determine the timeline and severity of an approaching storm.

## **4. STAY INDOORS DURING THE STORM AND DON'T OVER EXERT YOURSELF**

Overexertion can bring on a heart attack—a major cause of death in the winter.
